# Infinity IT Group Introduction

IT Peace of Mind

Founded in 1993 by **German and Thai entrepreneurs**, Infinity IT Group combines European engineering discipline with deep Southeast Asian market expertise.

We design and operate reliable, scalable IT environments for organisations with complex operational requirements.

With over **500 successful enterprise projects**, including numerous multi-location implementations, we have extensive experience supporting distributed businesses across a wide range of industries, including manufacturing, engineering and construction, energy and utilities, financial services, education, government, real estate, aviation, hospitality, technology, media, and professional services.

We serve **European and multinational organisations** operating in Thailand, as well as international schools, universities, diplomatic and chamber organisations, industrial manufacturers, logistics operators, and high-growth technology companies.

As a single, **end-to-end IT partner**, we integrate **digital business solutions**, such as ERP systems, Odoo, and system integrations, with robust **IT infrastructure and managed services**. This approach reduces vendor fragmentation and ensures seamless coordination across software, hardware, cloud platforms, and on-site operations.

Our **Thai–English bilingual engineering teams** operate across all support shifts, bridging communication between international management, global platforms, and local operational teams.

Supported by **structured SLAs**, transparent ticket tracking, and **an average 24-hour response time**, we provide continuous communication, clear visibility, and dependable long-term support

# Some of Our Clients

# Who We Are

# Why Infinity IT Group is the Right IT Partner

These are the reasons why our long-term clients, many of whom have stayed with us for 20+ years, choose to partner with us.

## ***30 Years of Expertise***

Since 1994, we unite a team of seasoned professionals, completing 500 projects across Thailand and the Asia Pacific.

## ***One-Stop Service***

From strategy and implementation to ongoing support, we act as your single point of accountability.

## ***Strategic Partnership***

With our preventative measures, we anticipate your needs and guide you every step of the way toward a healthy, future-ready IT ecosystem.

## ***Tailored Solutions***

We craft IT strategies specifically tailored to your business' unique goals, challenges, and needs.

## ***Exceptional Aftersales Support***

We respond promptly and communicate clearly, making it easy for you to reach us whenever you need support.

## ***Multicultural Competence***

We bridge the gap between headquarters and local teams, adapting solutions to local regulations and cultural nuances.
